PLEASE SUPPORT LA VOZ WITH YOUR DONATION!

La Voz Bilingual Newspaper is celebrating! We have completed our tenth year!

We are the only serious bilingual newspaper north of the Golden Gate Bridge. La Voz is a unique and valuable community resource, supported by the educational community, elected officials, business owners, unions and concerned citizens all over Northern California. We need your support to continue our efforts to produce this positive, educational, enjoyable and beautiful newspaper. **Our research has shown that the majority of our Hispanic community members do not read the English-language dailies.** Important information is not reaching a large segment of our people. Critical, even lifesaving, information is not getting where it needs to go.

We need your help to be able to distribute free copies of La Voz to the community and to schools, child-care centers and nonprofit agencies that send La Voz home to families.

Please contribute at one of the donor levels. Our goal is to grow a viable business that will support many young people who will continue this effort. We need to hire advertising sales people, translators, writers, photographers and reporters to bring you the news, thoughts and creativity of our diverse population.

La Voz Bilingual Newspaper teaches English and Spanish. We cover stories and events not available in the major media. We offer an opportunity for artists, poets and writers to publish their work. We have helpful information about business, retirement, taxes, immigration, voting, entertainment, the arts, food, education and the schools, opinions, events, people, for kids, and much more. Generally, we don't take yesterday's news off the wire services and fill up our pages with useless and often questionable material. We are a family-oriented publication. All advertising and content is suitable for any age.

La Voz is published in full color with original cartoons, illustrations and photographs on beautifully designed pages. We are proud of our award-winning publication, which is beginning to draw the attention of many national advertisers, political figures, educators and citizens.
